Open to Remote Opportunities & Relocation

PROFILE

Senior Mobile Developer with 9+ years of experience in Android (Kotlin/Java), Flutter, and .NET backend. Delivered and published production apps on Google Play and the App Store across restaurant management, real estate, booking, and e-commerce. Experienced in Clean Architecture, multi-module development, technical leadership, and AI-assisted development using Claude Code.

TECHNICAL SKILLS

Android: Kotlin, Java, Android SDK, Jetpack Compose, XML Views, Coroutines, Retrofit, Room, Hilt, Koin, Paging 3, Navigation Component, Firebase Cloud Messaging (FCM)

Flutter: Dart, BLoC/Cubit, http, sqflite, go_router, get_it, Android & iOS publishing

Architecture: Clean Architecture, MVVM, MVI, MVP, Multi-Module, Dependency Injection, Offline-first caching

Backend: C#, ASP.NET Core Web API, .NET 10, EF Core, SQL Server 2022, REST APIs, Payment gateways (MyFatoorah, We Accept)

Quality & Delivery: Unit testing, Git, GitHub Actions (CI/CD), Docker, Firebase Crashlytics, Google Play Console, App Store Connect

AI Tools: Claude Code, ChatGPT, Spec-Driven Development (Spec Kit)

PROFESSIONAL EXPERIENCE

Mobile & Full-Stack Developer | EcomFlow | Saudi Arabia (Remote) **Jan 2026 – Present**

• Led technical analysis, architecture and delivery of a multi-tenant restaurant SaaS; coordinated with management and guided developers.

• Developed two Flutter apps (Merchant and Manager) and ASP.NET Core / .NET 10 APIs backed by SQL Server; published the apps on Google Play and the App Store.

• Reduced database reads by 45x–800x in selected workloads and strengthened API and database security.

• Integrated the MyFatoorah payment gateway; containerized services with Docker and used Claude Code for development, debugging and testing.

Mobile Developer | Independent | Egypt (Remote) **Oct 2023 – Jan 2026**

• Developed Booking Hotels & Trips, a native Kotlin Android booking app for a Saudi client, with MVVM, Retrofit, Coroutines, Koin and Google/Facebook sign-in.

• Built Movie Explorer in Flutter with BLoC, Clean Architecture, REST integration and SQLite offline storage.

• Created a multi-module Marvel Characters Android app using Jetpack Compose, Hilt, Paging 3 and type-safe navigation.

Android Developer | TECHCUBICS | Egypt (Remote) **Sep 2022 – Sep 2023**

• Delivered native Kotlin e-commerce and clinic apps using MVVM/MVI, Coroutines, Retrofit and modular architecture.

• Integrated REST APIs, Firebase Analytics and dependency injection with XML-based Android UI.

• Wrote unit tests to improve reliability and published 2+ Android applications on Google Play.

Android Developer | CODEEVOO | Germany (Remote) **Mar 2021 – Apr 2022**

• Built a Kotlin golf news Android app integrating WordPress REST APIs, Room, Koin and Firebase Cloud Messaging push notifications.

• Redesigned a chat application UI to improve usability and visual consistency.

• Developed a localization tool exporting translated Android XML resources from English to German.

Co-Founder & Full-Stack Developer | iMATCH | Egypt **Mar 2017 – Jan 2021**

• Led mobile, backend and design teams; gathered client requirements and translated them into delivered solutions.

• Developed Android apps, C#/.NET backends and SQL Server admin dashboards for real estate, booking and e-commerce clients.

• Published 5+ Android apps on Google Play and managed project delivery, including We Accept payment integration.

SELECTED PROJECTS

EcomFlow - Merchant & Manager Apps - Google Play - App Store - Merchant - App Store - Manager

Flutter (Android/iOS/Web), ASP.NET Core Web API, SQL Server - Two Flutter apps and APIs for a multi-tenant restaurant SaaS. Used Spec-Driven Development with Spec Kit.

Booking Hotels & Trips - Video Demo

Kotlin, MVVM, Retrofit, Coroutines, Koin - Android booking app with REST APIs and Google/Facebook sign-in.

Orouba - Real Estate Apps - Community Demo - Listing Demo

Android (Java/Kotlin), C#, ASP.NET, SQL Server - Two real-estate apps with backend services and admin dashboards.

Allonsy - Venues & Events Booking - Video Demo

Android (Java/Kotlin), ASP.NET, SQL Server - Events booking app with We Accept online payment integration.

Golf News - Android News App - Video Demo

Kotlin, Room, Koin, FCM, WordPress REST API - Android golf news app with WordPress API integration, media content and push notifications.

PRACTICAL PROJECTS

Movie Explorer (Flutter Demo) - GitHub

Flutter, Dart, BLoC, Clean Architecture, sqflite, go_router, get_it - Movie app with REST APIs and offline storage.

Marvel Characters (Android Demo) - GitHub

Kotlin, Jetpack Compose, Multi-Module, Hilt, Paging 3 - Modular Android app consuming a public API.

E-Wallet (Android Technical Demo) - GitHub

Kotlin, Jetpack Compose, MVI, Multi-Module, Dagger-Hilt, Room, CameraX, ZXing - E-wallet practice app demonstrating modern Android UI and architecture.

EDUCATION

B.Sc. Management Information Systems - Egyptian High Institute, Alexandria, Egypt
